Made in Webflow

Webflow

Webflow empowers designers to build professional, custom websites in a completely visual canvas – without writing code.

Recommended for
Marketing/ Growth hacking teams, E-Commerce, Startups, etc

PROs

Great levels of design customization, without having to know code

Excellent range of templates, suitable for ecommerce and dynamic content

Advanced SEO Control

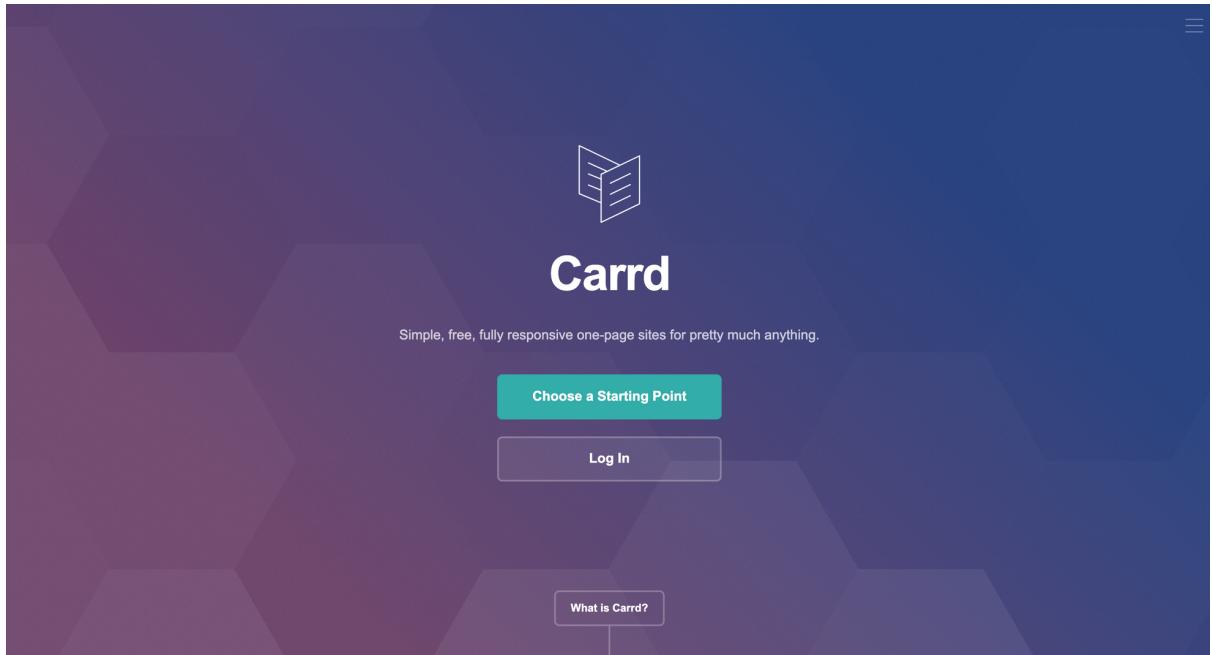

Automatic versioning of software

Supports Custom Code/ Lottie Animations

CONs

Expensive plans, with prices ranging from \$12/month to \$212/month

Relatively difficult to use for a website builder, especially in comparison to Wix or Carrd

Carrd

Carrd is a free platform for building simple, fully responsive one-page websites. Whether it's a portfolio or landing page, Carrd lets you build it beautifully and easily.

Recommended for
Personal Websites, Portfolio's, Wedding websites etc.

PROs

Easy to use

Attractive templates

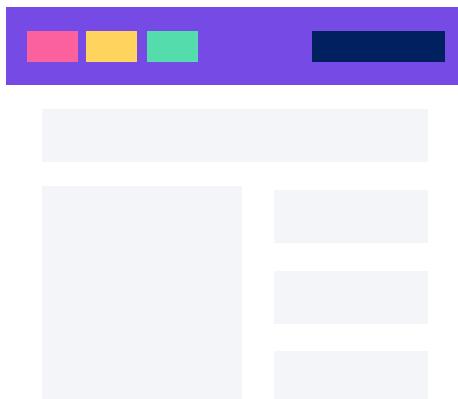

Cost Effective (7 day free trial + Plans starting from \$9/year)

CONs

Single page websites only

Cannot build dynamic websites/ E-commerce websites

No-Code tools to build

Try Shopify free for 14 days, no credit card required. By entering your email, you agree to receive marketing emails from Shopify.

Shopify

Shopify allows you to create and manage ecommerce websites. Build and host your store, fulfil orders, and use Shopify's plugin marketplace to market your products — all in one place.

Recommended for
Ecommerce Stores, Small Businesses

PROs

Easy to use for a layperson. Super simple to build and manage their online store.

Sell not only physical products, but also digital services.

Attractive modern templates.

Free 14-Day trial for first time users.

CONs

Bit expensive as compared to competitors

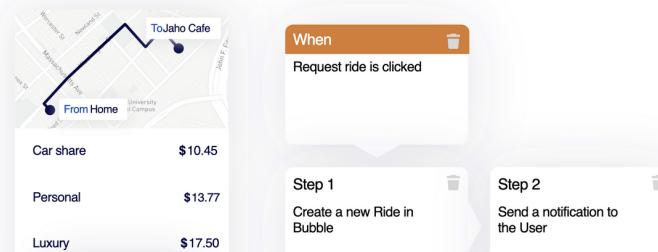

No way to evade transaction fees, even if you use third-party services.

The most powerful no-code platform

Bubble enables anyone to design, develop, and launch powerful web apps without writing code.

[Get started for free](#)

Join 493,651 Bubbler today and start building.

Bubble

Bubble is a visual programming language and application platform that lets you create interactive, multi-user applications for desktop and mobile browsers. Build out logic and manage a database without writing a single line of code.

Recommended for
Indie Makers, Entrepreneurs, Designers, Startups

PROs

Build powerful applications with a custom backend all without code.

Run full fledged SaaS services built and managed in Bubble.

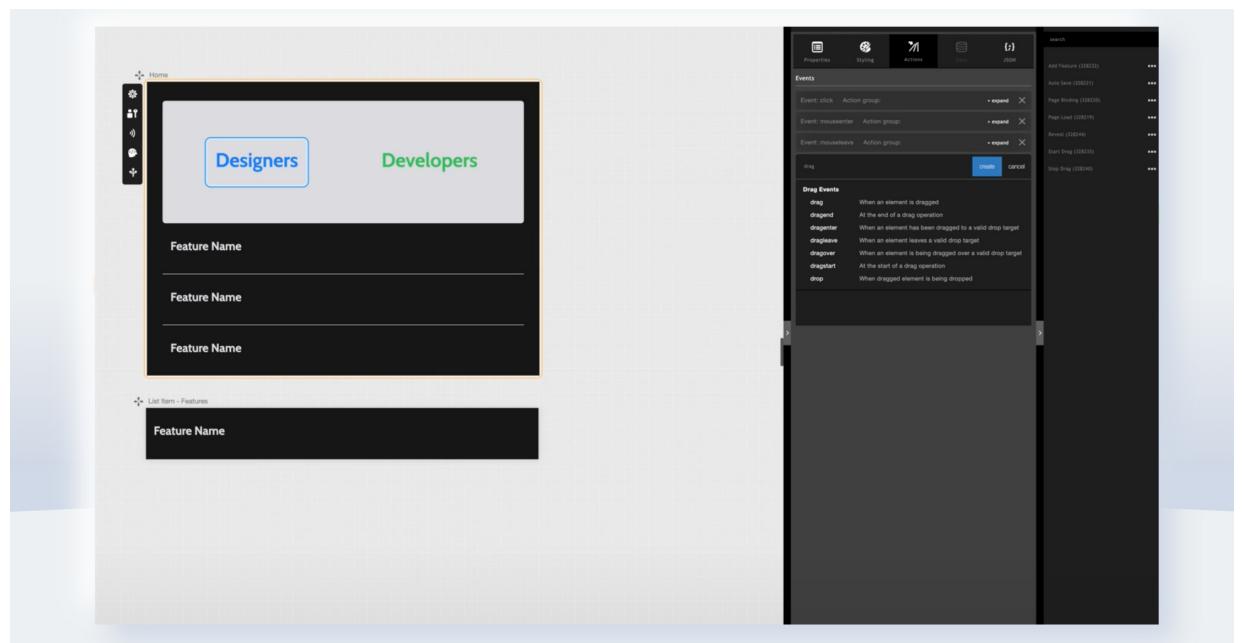

Free to build the application, pay once ready.

CONs

Steep learning curve

Not the best UX for a web app builder

Making the web application responsive is quite complicated.

Bildr

Bildr is an open-ended & collaboration focused website and web app builder. It focuses heavily on pre-made project templates, and symbols but provides support for custom elements, actions, and external libraries.

Recommended for
Indie Makers, Entrepreneurs, Designers

PROs

Real-time collaboration with team members.

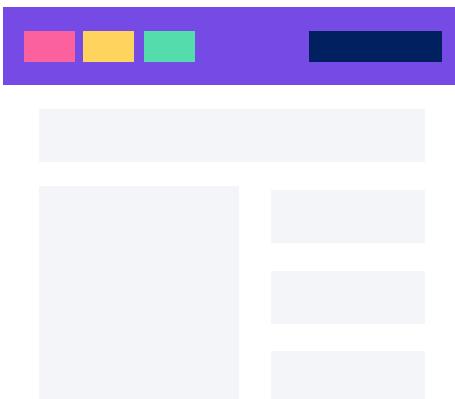

Support for external libraries.

Third-party API Integration, with secrets and custom headers.

CONs

Still in beta

No-Code tools to build

Mobile Applications

Create an app from a Google Sheet in five minutes, for free.

Glide turns spreadsheets into beautiful, easy-to-use apps.

[Get Started](#)

Glide

Glide lets you turn spreadsheets into apps, without code. Create easy-to-use apps in just 5 minutes from a Google Sheet.

Recommended for
Corporates, Students, Indie Makers, Side Hustlers

PROs

Build mobile applications with backend data coming from Google Sheets.

Easy to learn and use, even for school students.

Easy stripe integration to create an ecommerce app.

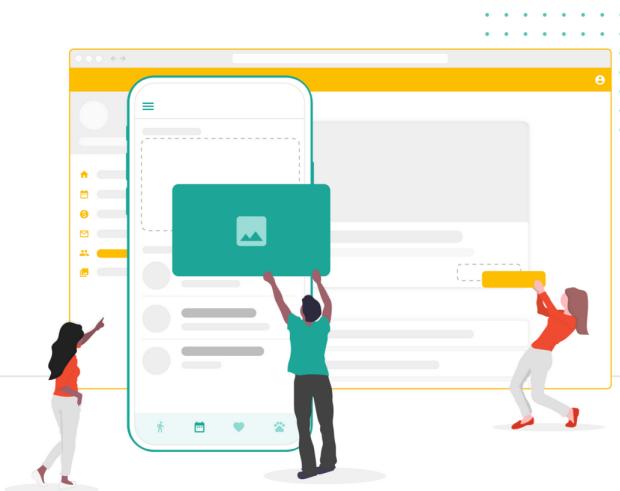

CONs

Can't publish apps to the Appstore/Playstore, yet.

Not much design freedom.

Meet Adalo.

Turn Your **Amazing App Concept**
Into Reality Without Coding!

[GET STARTED FOR FREE!](#)[▶ WATCH VIDEO](#)

Adalo

Adalo makes creating apps as easy as putting together a slide deck. Turn your idea into a real native app — no code needed!

Recommended for
Designers, Students, Indie Makers, Entrepreneurs, Startup

PROs

Easy to use interface to build mobile applications visually.

Can publish apps to the appstore, with the help of Adalo team.

Component marketplace to find custom, ready-to-use components to use in applications.

CONs

Pricing is much higher as compared to Glide and Thunkable. Pro plan costs \$50/month.

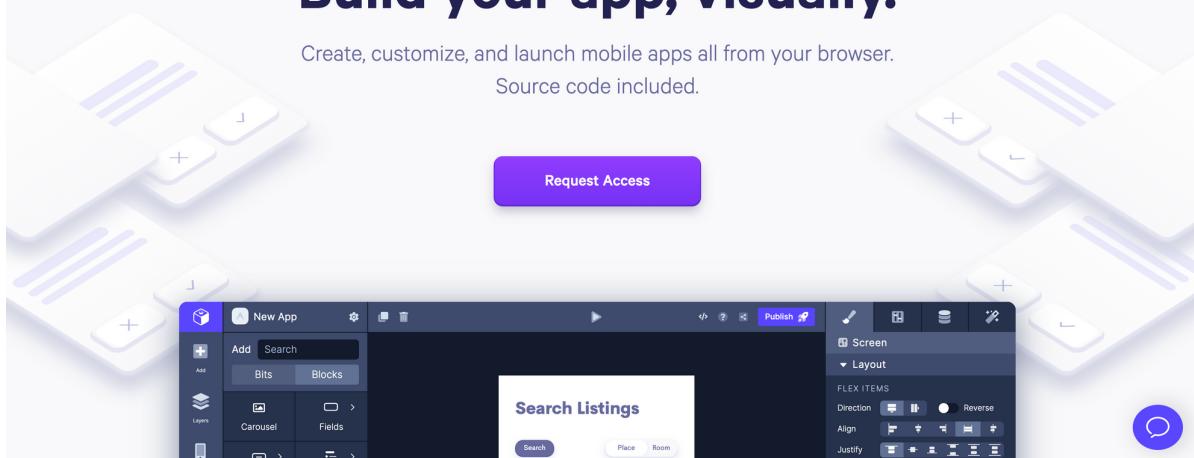

Very little design freedom while developing the applications.

Build your app, visually.

Create, customize, and launch mobile apps all from your browser.

Source code included.

[Request Access](#)

Draftbit

Build your app, visually. Create, customize, and launch mobile apps all from your browser. Source code included.

Recommended for
Designers, Students, Indie Makers, Entrepreneurs

PROs

Create highly customizable mobile applications for both iOS and Android platforms.

Create custom design for your applications.

Add custom code to further create powerful features in the application.

Export React Native code and publish on Playstore/Appstore.

Integrate with external databases through API, such as Airtable

CONs

Still in Beta

Basic knowledge of coding concepts is required to fully explore all the features Draftbit has to offer.

Build your own apps

Thunkable enables anyone to create beautiful and powerful mobile apps.

[Get started for free](#)[See featured apps](#)

What can you build on thunkable?

Thunkable

Thunkable is a drag and drop mobile app builder that lets you create iOS and Android apps without coding. Apps built on Thunkable can work across all devices and can be directly published in the iOS App Store or Google Play Store.

Recommended for
Designers, Students, Indie Makers, Entrepreneurs

PROs

Create powerful mobile applications without knowing code.

Publish to Playstore/Appstore or keep using as a web application.

Use touch interface components and build mobile games.

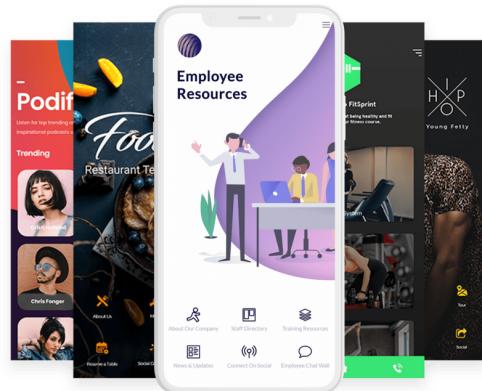

CONs

Little design freedom while building an application.

The Ultimate App Creator for iOS & Android

Powering Over 10,000 Apps
On Our Platform

BuildFire

Build powerful mobile apps for iOS & Android with the ultimate App Creator from BuildFire. Get started on developing your custom mobile app today.

Recommended for
Enterprise, Designers, Entrepreneurs

PROs

Drag and drop builder to build and publish mobile applications.

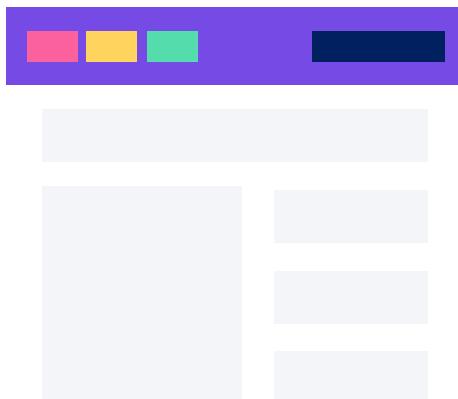

Array of plugins available for adding further functionalities in the application.

CONs

The lack of custom design freedom makes most apps look the same.

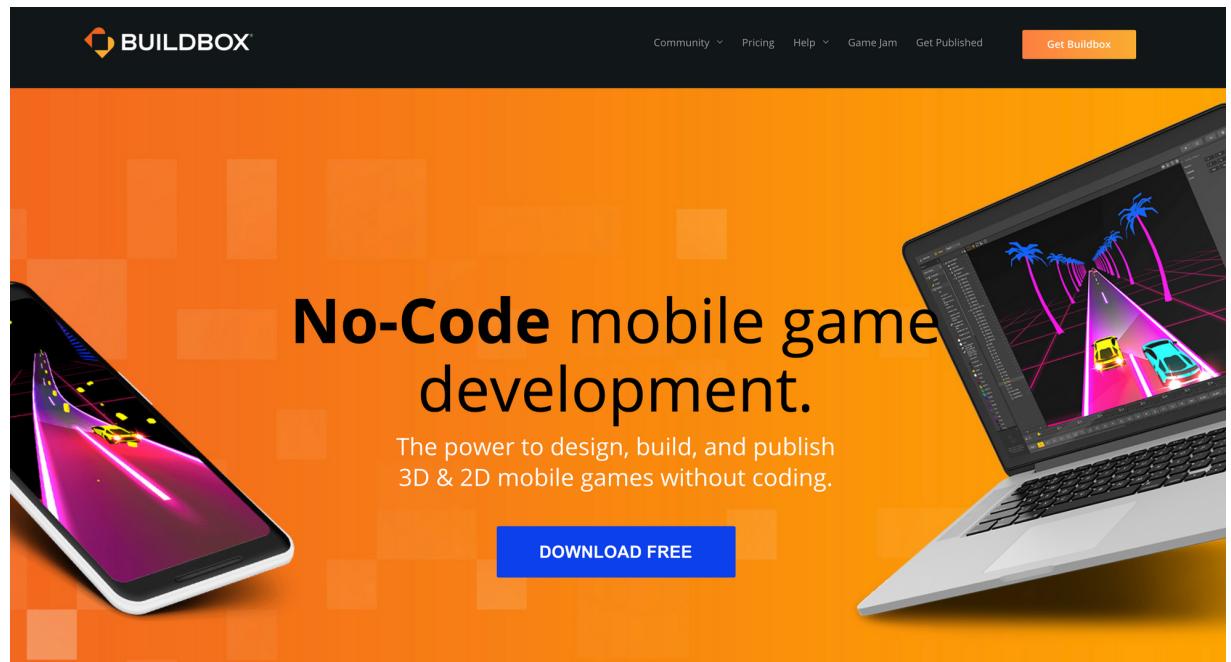

Very high pricing plans. Lowest plan starts from a whopping \$159/month.

No code tools to build

Gaming Apps

The landing page features a large orange background with a smartphone on the left showing a 3D racing game and a laptop on the right displaying a 3D game development interface. The central text reads "No-Code mobile game development." and "The power to design, build, and publish 3D & 2D mobile games without coding." A blue "DOWNLOAD FREE" button is positioned below the text.

BuildBox

No-Code: The power to design, build, and publish 3D & 2D mobile games without coding.

Recommended for
Designers, Students, Indie Makers, Entrepreneurs

PROs

Create 2D and 3D games visually without knowing how to code.

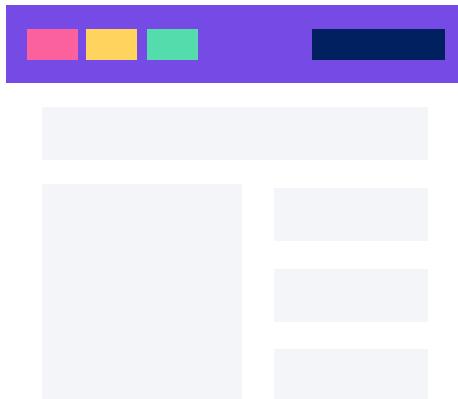

Pre-made components and animations to speed up the game development process.

Monetize your games by adding external SDK's to the app.

CONs

Limited power as only pre-made components can be used to create games.

No code tools to build

Voice Apps

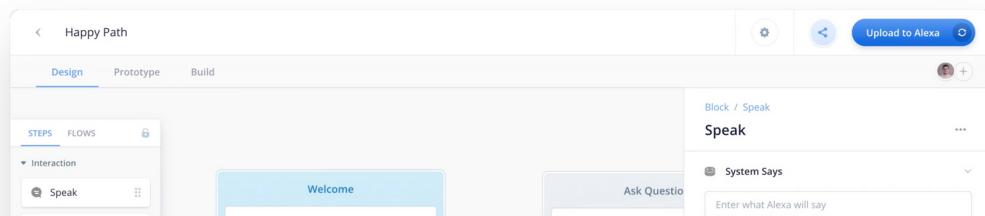

Design, prototype and build voice apps

Collaboratively design, prototype and build voice applications for Amazon Alexa and Google Assistant. No coding needed.

[Get Started for Free](#)

Building a Custom Assistant? See more →

Voiceflow

Collaboratively design, prototype and build voice applications for Amazon Alexa and Google Assistant. No coding needed.

Recommended for
Designers, Students, Indie Makers, Entrepreneurs

PROs

Drag-and-drop voice app builder, easily usable for people with no technical expertise.

Publish to Alexa and Google Home right from the Voiceflow editor.

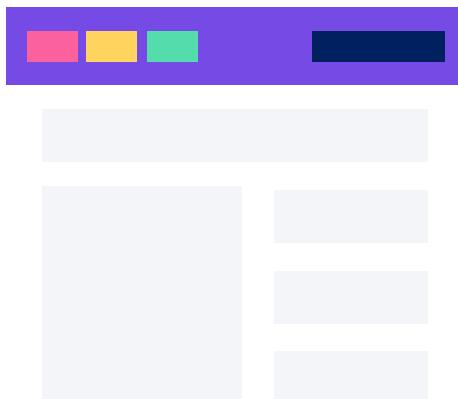

Create voice apps for all languages available on Alexa and Google Home.

Test the apps quickly in the editor only without leaving the dashboard.

CONs

Better video guides and tutorials to explain voice interface terminology can be made.

No code tools to build

Automation

The screenshot shows the Zapier web interface. At the top, there's a navigation bar with links for Home, Apps, Explore, Tips & Advice, Invite Team, Make a Zap!, and user profile information. Below the navigation is a search bar with placeholder text "What Do You Want to Automate Today?". Underneath the search bar are two input fields: "Search for an app" and "with this one!". A note says "It only takes a few minutes to save hours (or even days) of work" with a "Make a Zap!" button. To the right, there's a sidebar titled "Level up with Zapier" showing a progress bar at 80% completion with five checked items: "Sign up for Zapier", "Create your first Zap", "Build a Multi-Step Zap", "Filter unwanted data in your Zap", and "Build an advanced workflow with Paths". Below the sidebar, there's a section titled "Connect Google with 1-Click" with a "Connect All My Google Apps" button. The main content area shows "Popular Zaps for All My Apps (3)" with three examples: "Add new Google Contacts with name, email, and phone number from new Gmail emails", "Create Trello cards for new MailChimp subscribers", and "Create Trello boards from new MailChimp campaigns". Each zap has a "Use This Zap" button. At the bottom of the main content area, it says "1-3 (of 957)".

Zapier

Easy automation for busy people. Zapier moves info between your web apps automatically, so you can focus on your most important work.

Recommended for
Designers, Students, Indie Makers, Entrepreneurs

PROs

Connect almost any app to any other app to build custom automations and save time.

Easy to use step-by-step interface to create complex automations.

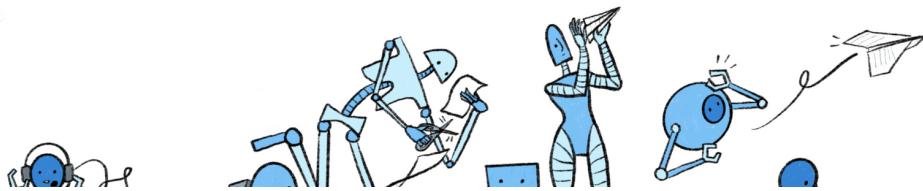

Multiple steps and multiple tools in a single automation workflow can be created.

CONs

Doesn't always have the required trigger for the app that you must be willing to automate.

No. of zaps available are less compared to competitors like Integromat. Zapier gives 100 zaps on the free plan whereas Integromat gives a 1000 runs.

Parabola makes it easy to automate your manual, repetitive data tasks.

Parabola

Parabola is a drag-and-drop productivity tool with a library of customizable, pre-built components designed for ecommerce operations and marketing teams to pull in data, combine and transform it in bulk, and automatically take action.

Recommended for
eCommerce stores, Marketers, Designers

PROs

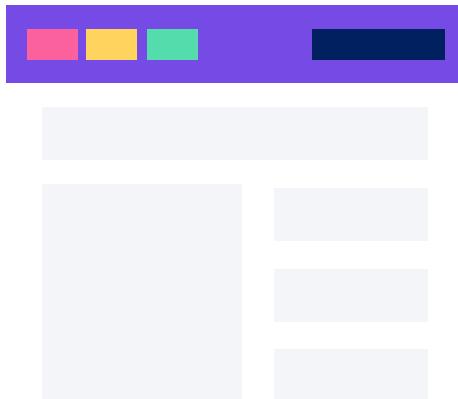

Automation software that not only connects different apps but performs operations on the table data.

Plans start as low as \$4/month

CONs

Only 15 run credits in the free plan

No code tools to build

AR/VR/3D

3D powered product visuals for eCommerce

Scapic is a one-stop shop for all your high converting 3D & AR product visuals

[SCHEDULE DEMO](#)

Scapic

Scapic is a one-stop shop for integrating 3D images and augmented reality (AR) into eCommerce websites that are built on platforms like Shopify and WooCommerce.

Recommended for
eCommerce stores, Marketers

PROs

Lets you generate 360° views of your products and create 3D experiences, all within your browser.

Direct integration with Shopify

No limits on number of products

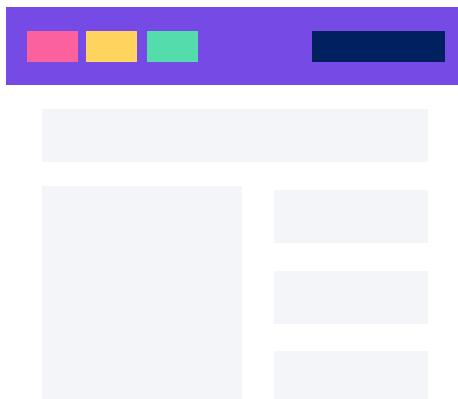

CONs

No free plan.

Pricing based on number of impressions per month.

To get a quote, one must schedule a demo with their team.

No code tools to build

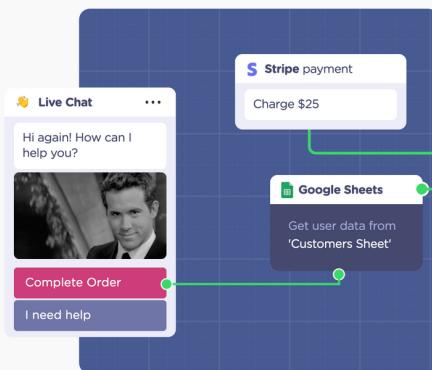

Chatbots

The Most Intuitive No Code Chatbot Builder

I agree

Landbot

Landbot manages and automates conversations on the main messaging channels to help you convert smarter, every time. Design, deploy and analyze your conversational strategies from a single dashboard – without code.

Recommended for
SaaS platforms, Marketers, Indie makers

PROs

- User-friendly interface for visually building your conversation bots.
- WhatsApp Integration via Business API.
- Wide variety of third-party integrations.

CONs

- Relatively steep learning curve.
- Cost per Seat can grow unreasonably.

Great customer relationships start here

Give customers a conversational experience they'll remember—and come back for. It all starts with the #1 Business Messenger.

Motivation & Engagement is more important than ever

Your all-in-one tool to connect, align, motivate and engage your employees, channel partners, sales and consumers

[GET STARTED](#)

2+ MILLION USERS WORLDWIDE

Xoxoday

[View Project ↗](#)

Xoxoday has built an all-in-one tool to connect, align, motivate and engage employees, channel partners, sales and consumers.

How did we help

We developed a dynamic website for Xoxoday using a No-Code website builder in order to minimize delivery time for such a massive project

Tools used

Webflow

Business Impact

Reduced Time to Market

The time it took from starting the project, to launching it to the market was reduced massively. Hand coding and creating a custom CMS for a project of this scale would have taken 3 times the time it took to build on Webflow.

Empowered Content Team

Xoxoday content team was given an easy to use dashboard where they could create, modify and publish dynamic content like Blog Posts without any technical knowledge.

We help entrepreneurs build & scale

An online guide that helps you verify if a person has common symptoms of COVID-19, find a testing location and donate to the WHO.

How did we help

We developed a COVID-19 chatbot that helped thousands of users identify symptoms and find testing locations without writing code.

Tools used

Landbot

Business Impact

Reduced Time to Market

Building with No-Code helped in shipping the app within a week – critical for its success in the market.

Client Testimonial

Building with No-Code helped in shipping the app within a week – critical for its success in the market. – Gaurav Bhatt

Helping Indian Startup Ecosystem grow

Startup India Foundation was founded by a group of entrepreneurs who have built successful businesses themselves and walked the path. Having built startups from scratch, raised multi-million dollar investments and built global businesses, distribution networks and strategic partnerships, the entrepreneurs understand what it takes practically for another first-time entrepreneur to build and scale a startup.

[Know More](#)

Startup India Foundation

[View Project ↗](#)

Startup India Foundation connects entrepreneurs from Tier II and Tier III towns & provides them with guidance, access to mentors and resources.

How did we help

We designed and developed a dynamic website using a No-Code website builder.

Tools used

Webflow

Business Impact

Reduced Time to Market

The project moved from Ideation to launch within a week – using a No-Code tool stack.

Cost Efficient

Using No-Code helped in saving up to 80% of development costs.
